DEPOSITARY:

National Westminster Bank plc Trustee & Depositary Services, Younger Building, 1st Floor. 3 Redheughs Avenue, Edinburgh, EH12 9RH

AUDITOR:

KPMG LLP 15 Canada Square, Canary Wharf, London, E14 5GL

ADMINISTRATOR & REGISTRAR:

Northern Trust Global Services Limited 50 Bank Street, Canary Wharf, London, E14 1BT

COMPANY INFORMATION

The ConBrio Funds is an Investment Company with Variable Capital under regulation 12 of the Open-Ended Investment Company Regulations and incorporated in England and Wales under registered number IC000234 and authorised by the Financial Conduct Authority with effect from 14 May 2003. Shareholders are not liable for the debts of the Company. At the period end, the Company contained six sub-funds, the ConBrio B.E.S.T. Income Fund, the ConBrio Managed Multi-Asset Fund, the ConBrio Sanford DeLand UK Buffettology Fund, the ConBrio UK Opportunities Fund and the ConBrio UK Smaller Companies Fund.

The Company is a UCITS scheme which complies with the Financial Conduct Authority Collective Investment Schemes sourcebook and is structured as an umbrella company so that different sub-funds may be established from time to time by the ACD with the approval of the Financial Conduct Authority and the agreement of the Depositary.

REPORT OF THE ACD TO THE SHAREHOLDERS OF THE COMPANY

The ACD, as sole director, presents its report and the unaudited financial statements of the Company for the period from 1 March 2015 to 31 August

The Company is a UCITS scheme which complies with the Financial Conduct Authority's Collective Investment Schemes sourcebook. The shareholders are not liable for the debts of the Company.

The Investment Objectives and Policies of each sub-fund of the Company are covered in the section for each sub-fund. The sub-funds of an umbrella company should be invested as if they were a single company. The names and addresses of the ACD, the Depositary and the Auditor are detailed on this page.

In the future there may be other sub-funds of the Company. As a sub-fund is not a legal entity, if the assets attributable to any sub-fund were insufficient to meet the liabilities attributable to it, the shortfall might have to be met out of the assets attributable to one or more other sub-funds of the Company.

Where a sub-fund invests in other Collective Investment Schemes, the maximum annual management fee that may be charged to that Collective Investment Scheme is 5% of the net asset value of such a scheme, however, it is expected that the actual annual management fee will not exceed 2%.

SUB-FUND CROSS-HOLDINGS

No sub-fund held shares in any other sub fund within the ICVC during the current or prior period.

DIRECTORS' STATEMENT

In accordance with the Regulations, we hereby certify the report on behalf of the directors of Premier Portfolio Managers Limited.

Neil Macpherson

Finance Director (of the ACD) 13 October 2015

Mark Friend

Chief Operating Officer (of the ACD)

IMPORTANT NOTE

Auditor Change

On 13 August 2015, KPMG LLP replaced KPMG Audit Plc as auditor of the ConBrio Funds.

CONBRIO FUNDS

ABOUT THE INVESTMENT ADVISER

Castlefield Investment Partners LLP (CIP) is an organisation specialising in the provision of investment management and advice to institutional-type investors, the majority of whom are charitable organisations. Company pension schemes and wealthy private individuals make up the balance of the underlying client base. The principals of the business formerly worked together as the senior executives of the specialist fund management arm of a merchant and private bank. Now working in partnership with colleagues and a significant, grant-making charitable foundation, CIP offers clients the benefits of boutique-like business focus, linked to the comfort that stable external investors can provide.

INVESTMENT REVIEW

MARKET REVIEW

Markets have endured a rollercoaster ride over the review period with sentiment ebbing and flowing according to the prevailing narrative. The period encompassed a shock UK election result, fears over China's growth trajectory and yet another existential threat to the Eurozone due to Greece.

Ultimately, Greece remains within the currency union, albeit with its debt problems unresolved, whilst China's travails have had a renewed impact on the oil price and other hard commodities too. With listed companies in these sectors representing significant parts of the UK equity market, their collapse has been a key driver of volatility during this period.

OUTLOOK

The single main issue for financial markets at the time of writing is that of the timing of the US Federal Reserve's first interest rate hike. After a period where the probability of a move in September steadily rose, the short-term equity market volatility led by the ripple effect from China's economic and stock market issues has seen analysts retreat from this prediction. The potential increase in emerging market fiscal stress is one of the reasons cited for delaying further, but with US unemployment having reached something close to its natural rate and tentative signs of real wages improving, the arguments for moving off the current emergency low rates remain credible. With the Bank of England expected to follow suit in early 2016, how consumers and corporates alike are affected – or perhaps more importantly how investors perceive them as being affected – will be a key driver of market returns over the coming months.

ONGOING CHARGES FIGURE (OCF)				
	31/08/15	28/02/15		
General Shares - Income	1.70%	1.85%		
Institutional Shares - Income	1.45%	1.60%		
Charity Shares - Income	1.45%	1.60%		

The ongoing charges figure is based on the last six month's expenses for the period ending 31 August 2015 and may vary from year to year.

It excludes the costs of buying or selling assets for the sub-fund (unless these assets are shares of another fund).

RISK AND REWARD INDICATOR (RRI)						
Typically lower rewards Typically higher rewards						
Lower risk					Н	igher risk
1	2	3	4	5	6	7

The sub-fund is ranked as 5 because it has experienced medium to high rises and falls in value over the past five years. Please note that even the lowest ranking does not mean a risk-free investment.

The Risk and Reward Indicator demonstrates where the sub-fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the sub-fund.

INVESTMENT OBJECTIVE AND POLICY

The investment objective of the ConBrio B.E.S.T. Income Fund is to predominantly generate a relatively high level of current income, together with income growth and some capital growth over the long term. The investment policy of the sub-fund is to invest principally in a portfolio of UK equities, although money market instruments, collective investment schemes, deposits, warrants, derivatives (for hedging purposes) and other permitted investments and transactions may also be invested in.

In seeking to achieve the stated investment objective, consideration will be given not only to traditional business and financial criteria, but also to environmental, ethical, social, governance and other similar issues. This is reflected in the name of the Fund where "B.E.S.T." is intended to indicate the investment criteria that will be applied to the Fund: Business, Environmental/ethical, Social/governance; and Transparency.

INVESTMENT REVIEW

PERFORMANCE

During the period under review the Fund produced a total return of -1.8%, as compared with the IA UK Equity Income Sector average return of -3.4%.

MARKET REVIEW

Markets have endured a rollercoaster ride over the review period with sentiment ebbing and flowing according to the prevailing narrative. The period encompassed a shock UK election result, fears over China's growth trajectory and yet another existential threat to the Eurozone due to Greece.

Ultimately, Greece remains within the currency union albeit with its debt problems unresolved whilst China's travails have had a renewed impact on the oil price and other hard commodities too. With listed companies in these sectors representing significant parts of the UK equity market, their collapse has been a key driver of volatility during this period.

PORTFOLIO ACTIVITY

During the period under review, the Fund has drip-fed cash into the market as interesting opportunities have arisen. We have continued to build the position in Carillion where we are comfortable with the security of the dividend that provides a yield of c5.5% and is therefore substantially in excess of the c3.6% yield on the general market. We are happy being paid to sit and hold the stock in the current climate. Elsewhere in the support services sector, the Fund participated in the IPO (initial public offering) of Lakehouse, a smaller company heavily involved in areas such as social housing and energy efficiency and where we see good prospects for growth, both organically and via acquisitions. Later in the period, the Fund invested in the IPO of Menhaden Capital, a specialist investment trust founded by Ben Goldsmith which will focus on both public and private markets in building a portfolio of renewable energy and resource efficiencyrelated assets. In addition, we used short-term weakness to increase holdings in AstraZeneca, GlaxoSmithKline, Debenhams and N Brown, each of which makes a meaningful contribution to the Fund's income-generation

On the sale side, the most notable disposal was the exit – in two stages – from Greggs. Greggs is a company which we remain strongly supportive of in terms of its responsible approach to business and where we hope that more people learn about the encouraging policies being pursued. However, the shares have enjoyed an excellent run as the strategic plan has gained traction and we feel that the future returns available have diminished as a result. It is a great business and one which the Fund will happily invest in again if that can be matched with a great price to buy in at.

OUTLOOK

With the UK election and its shock result now behind us, investors have to deal with the policy developments that are ensuing. For the Fund, key areas are the assault on renewable energy subsidies and the planned increases in the minimum wage. On the former, the Fund's infrastructure holdings have largely weathered the storm despite the incoherent policy attack they have come under; for the latter, retail companies are one example where

increased labour costs are perceived as a negative development, whereas we prefer to focus on the wider economic boost from real wages potentially increasing materially after several years of a cost of living squeeze. Elsewhere, the key developments to monitor will be the impact of a first US Federal Reserve interest rate hike and whether this exacerbates emerging market stresses, something which might cap potential market upside.

Source: Castlefield Investments, September 2015. Performance data taken from FE Analytics, quoted on a total return, bid to bid, UK sterling basis. Past performance is not a guide to future returns.

The total purchases and total sales during the period were as follows:

Purchases	Costs £'000	Sales	Proceeds £'000
Menhaden Capital	428	Greggs	602
Carillion	325	Tesco	221
Lakehouse	308		
AstraZeneca	169		
GlaxoSmithKline	169		
Debenhams	119		
Brown (N) Group	119		
Total purchases during the period were	1,637	Total sales during the period were	823

The ongoing charges figure is based on the last six month's expenses for the period ending 31 August 2015 and may vary from year to year.

It excludes the costs of buying or selling assets for the sub-fund (unless these assets are shares of another fund).

 $^{^{\}rm 2}\,$ From 1 February 2011 to 31 December 2011.

³ To 14 March 2014.

⁴ To 26 January 2011.

Typically lower rewards Lower risk 1 2 3 4 5 6 7

The sub-fund is ranked as 3 because the sub-fund and portfolios holding similar assets have experienced low to medium rises and falls in value over the past 5 years. Please note that even the lowest ranking does not mean a risk-free investment.

The Risk and Reward Indicator demonstrates where the sub-fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the sub-fund.

INVESTMENT OBJECTIVE AND POLICY

The investment objective of the ConBrio Managed Multi-Asset Fund is to generate a positive annualised return over a rolling 3 year basis. However, there is no guarantee that this objective will be achieved over that specific, or any, time period and there is always a risk of loss to your original capital. The sub-fund will invest in transferable securities (both quoted and unquoted), units and/or shares in other collective investment schemes, structured products, deposits, warrants, fixed interest securities, money market instruments, and cash and near cash. The sub-fund may also invest in derivatives and forward transactions for investment purposes as well as for efficient portfolio management (including hedging), and may also borrow and enter into stocklending and underwriting arrangements in accordance with COLL.

INVESTMENT REVIEW

PERFORMANCE

The Fund returned -2.5%, compared to an increase in the UK Consumer Price Index (a measure of inflation) of +0.5% during the 6 months under review.

MARKET REVIEW

Equities generally produced negative returns during the period as investors retreated from riskier assets in favour of cash and bonds. The sharp reversal in the price of crude oil, which had begun to rise again from the lows of January, has been prompted by a deceleration in the Chinese economy. With the price of crude retreating again, it fell below \$43/barrel towards the end of August having previously stood at almost \$68/barrel at the beginning of May. Although the fall in oil prices should translate to lower costs for industries in aggregate, the volatility as well as implications for trade from a slowing Chinese economy saw equities fall from the highs of April to end the period several percentage-points lower.

Nominal assets benefited as yields pulled back despite US and UK central banks signalling rate rises on the horizon. Benchmark UK 10yr yields went on something of a round trip during the period, rising from 1.8% at the start to hit 2.2% as the General Election prompted some uncertainty on UK fiscal discipline, before falling again as equities sold off and investors bought bonds, closing back at 1.8%.

PORTFOLIO ACTIVITY

During the period, we added to the conventional fixed income portion of the portfolio as well as to the structured products holdings. In March we added a new bond issue from Intermediate Capital using the proceeds from a maturing bond from EIB (the European Investment Bank) that had returned funds to the portfolio in the previous month. Intermediate Capital are a specialist finance firm providing mezzanine loans and have increasingly moved into fund management, providing a stable revenue stream and supporting their latest bond issue. We also added a specialised lending vehicle to the Fund which provides loans to small businesses via

online platforms. The underlying loans are secured on business assets and the vehicle offers an alternative to conventional fixed income instruments.

We added two structured products to the portfolio, one of which provides a bond-like nominal return with the potential for more material upside linked to a basket of stocks, while the other a new issue linked to the FTSE 100 and S&P 500. We also acquired a stake in a newly launched investment trust, Menhaden Capital, which will target renewable infrastructure investments, joining a small but steadily growing subsector within this niche. Interestingly for us, the trust will use a hybrid structure which will target direct infrastructure investments alongside listed opportunities, reducing the potential for cash drag which can hamper returns from other captive or patient capital vehicles.

OUTLOOK

With the prospect for interest rate increases on the cards for both the US and UK central banks during the remainder of the reporting period, we continue to view prospects for bonds warily. The fixed income portion of the portfolio has held up relatively well in the current environment, offsetting some of the declines witnessed for the equity linked portion of the portfolio. With certain alternative income generating assets such as infrastructure and commercial real estate also holding up relatively well, benefitting from continued buoyancy in employment and infrastructure spending, we continue to favour these alternatives to conventional investment grade and long dated paper. The equity market turmoil of the past few months has been a largely overdue correction to more elevated valuations and we continue to see the equity-linked structured products as an attractive means to deliver returns. The increase in market volatility has also resulted in an improvement in the terms at which such products are struck and we continue to see these as an appropriate means to deliver good risk adjusted returns.

NOTE TO THE FINANCIAL STATEMENTS

1. ACCOUNTING POLICIES

The interim financial statements have been prepared under the historical cost convention, as modified by the revaluation of investments and in accordance with the Statement of Recommended Practice 'Financial Statements of Authorised Funds', issued by The Investment Association in May 2014, the Financial Conduct Authority's Collective Investment Schemes sourcebook and the Instrument of Incorporation.

DISTRIBUTION TABLES

Expenses exceeded revenue during the period, as a result no distributions were paid (2014: same).

ONGOING CHARGES FIGURE (OCF)				
	31/08/15	28/02/15		
General Shares - Income	2.08%	2.13%		
Institutional Shares - Income	1.58%	1.63%		

The ongoing charges figure is based on the last six month's expenses for the period ending 31 August 2015 and may vary from year to year.

It excludes the costs of buying or selling assets for the sub-fund (unless these assets are shares of another fund).

		RISK AND RE	WARD IND	ICATOR (RRI)		
Typically lo	wer rewa	ırds		Туріс	ally highe	er rewards
Lower risk	•				→ I	Higher risk
1	2	3	4	5	6	7

The sub-fund is ranked as 5 because the sub-fund and portfolios holding similar assets have experienced medium to high rises and falls in value over recent years. As there is less than five years of available data for this sub-fund, for illustrative purposes a similar index has been used to calculate the risk/reward profile. Please note that even the lowest ranking does not mean a risk-free investment.

The Risk and Reward Indicator demonstrates where the sub-fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the sub-fund.

INVESTMENT OBJECTIVE AND POLICY

The investment objective of the ConBrio Sanford DeLand UK Buffettology Fund is to seek to achieve an annual compounding rate of return over the long term which is superior to the performance of the UK stock market. The sub-fund will invest principally in a portfolio of UK equities, and may also invest in other transferable securities, money market instruments, units and/or shares in other collective investment schemes, deposits, warrants, cash and near cash. The Investment Adviser will adopt a focussed approach to investing in shares of those companies which it believes have strong operating franchises and experienced management teams and whose shares are undervalued and offer the potential for improved economic growth.

The sub-fund may also invest in derivatives and forward transactions (for hedging purposes). The sub-fund may borrow and may enter into stocklending and underwriting transactions in accordance with COLL.

INVESTMENT REVIEW

PERFORMANCE

Over the six months ended 31 August 2015, the Fund achieved a total return of 5.9%, while the Fund's peer group, the IA UK All Companies sector, fell by 3.6%.

MARKET REVIEW

Although the UK stock market reached a new all-time high on 27 April, the gains were soon given up as worries about the situation in Greece, a hard landing in China, impending tighter monetary policy and the outlook for the global economy weighed on investor sentiment. Beyond 27 April, the stock market suffered a correction of 15% culminating in a violent downward lurch on 24 August (dubbed another 'Black Monday' by the commentariat). Under these circumstances, the Fund did very well to achieve a positive return during this correction phase. This was due to good results and trading statements from most portfolio companies. The Fund also benefited from the return to fashion of small and mid-cap companies after

³ From 18 March 2014 to 31 December 2014.

⁴ The net asset value per share is calculated on a bid basis and excludes any distribution payable.

the dreadful 2014 that they endured and in the wake of the conclusive General Election.

PORTFOLIO ACTIVITY

Over the period we made the decision to sell two holdings in their entirety. The first, Driver Group, has been a mainstay of the portfolio since we launched in 2011. However, in recent months, a change of senior personnel has brought a cost-led expansion at a time when some of the group's markets are challenging. The second, Elementis, has only been in the portfolio since May 2013. In that time, the share price had risen to a full valuation. Given the company's exposure to North American oil shale markets, the decision was taken to take profits on the holding. Subsequently, Elementis issued a profits warning. There have been some small additions to existing holdings but nothing material. A new investment was made in AB Dynamics following extensive research and a day spent with the management. AB Dynamics supplies advanced bespoke vehicle testing technology and products to the global automotive industry.

During the period, the investments that most benefited the Fund were Dart Group (share price up by 55.0%), Air Partner (50.2%), Scapa Group (36.5%), Domino's Pizza Group (22.5%), Mattioli Woods (15.1%), Liontrust Asset Management (14.4%) and James Halstead (11.7%). The main detractors from performance were RWS Holdings (-21.7%), A.G. Barr (-16.0%), Rotork (-12.9%), Latchways (-11.4%), GlaxoSmithKline (-10.7%) and Diageo (-8.8%). However, since the period end, Latchways has recommended a cash offer from MSA Safety Inc.

OUTLOOK

Already the game has shifted to trying to call whether 'Black Monday 2015' was the capitulation phase of the correction going back to April, or the start of something more sinister. We suspect the former. But, the stock market is a great leveller. It may indeed make us look a complete fool by going from a 15% correction to a full blown bear market. If so, we don't care to predict it or pre-empt it. All we know is that we will be best served over many years by concentrating on getting our investments right and swinging at the ball when the pitch is fattest. That means when share prices are lower because others are losing their head. Be greedy when others are fearful and fearful when others are greedy.

To conclude, we again reiterate that the success of our company investments should be judged by their operating results not their share price movements. We remain confident in our 'Business Perspective Investment' philosophy and its ability to generate above-average long-term gains from marketable securities.

ONGOING CHARGES FIGURE (OCF) 31/08/15 28/02/15 General Shares - Income 1.92% 1.94% Institutional Shares - Income 1.42% 1.44% Charity Shares - Income 1.17% 1.19%

The ongoing charges figure is based on the last six month's expenses for the period ending 31 August 2015 and may vary from year to year.

It excludes the costs of buying or selling assets for the sub-fund (unless these assets are shares of another fund).

Typically lower rewards Lower risk Typically higher rewards Typically higher rewards Higher risk 1 2 3 4 5 6 7

The sub-fund is ranked as 6 because it has experienced relatively high rises and falls in value over the past five years. Please note that even the lowest ranking does not mean a risk-free investment.

The Risk and Reward Indicator demonstrates where the sub-fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the sub-fund.

INVESTMENT OBJECTIVE AND POLICY

The investment objective of the ConBrio UK Opportunities Fund is to invest primarily for long term capital growth from a portfolio of investments. The investment policy of the sub-fund is to actively invest in those companies, primarily within the UK, where the Manager believes there are above average opportunities for growth.

INVESTMENT REVIEW

PERFORMANCE

During the 6 months under review to 31 August 2015, the Fund achieved a total return of -4.7%, compared to the IA UK All Companies sector average return of -3.6%.

MARKET REVIEW

Towards the end of the six-month period under review, markets finally caught up with some of the negative sentiment that had been building through the year, despite a strong start which coincided with the high point for equities. This was initially down to some positive developments including a degree of stability in the price of crude oil which had fallen through the second half of 2014. In addition, the UK continued to post steady, if unspectacular, growth in employment, wages and economic growth, and the UK general election returned a surprise majority government. However, the brief rally that markets enjoyed was swiftly overtaken by events overseas that prompted the fall in markets over the period as a whole.

The return of falling oil prices coincided with the protracted negotiations between Greece and her creditors resulting in a surprise snap election. The ultimate outcome of a return for the incumbent Syriza party appears to be that we are a step closer to creditors accepting some form of debt forgiveness. This, on top of a recognition that the Chinese economy is growing at a much slower rate than in the past, has seen global equities retreat over the period.

PORTFOLIO ACTIVITY

We entered the period with very little exposure to the Oil & Gas sector. Whilst this had been the right position through the latter half of last year, we maintained this going into the new period as we felt returns from stocks in the sector would lag the fall in the price of the underlying commodity. Our only exposure to any of the domestic oil majors was to BG Group which outperformed after it was approached by Shell with an unsolicited bid in April. The sharp increase in BG Group's share price reflected the large premium Shell was prepared to pay in order to secure the oil reserves that BG Group has historically been very successful in discovering. Whilst the approach by Shell is largely opportunistic, the substantial amount of capital required to further develop some of the largest of BG Group's recent discoveries, particularly the deep-water oilfields off the coast of Brazil, would represent a substantial drain on the resources of BG Group and its shareholders. Meeting this future capex requirement now falls on Shell rather than BG Group shareholders, making the offer an attractive one in the current environment.

Within the remainder of the portfolio, Merger and Acquisition (M&A) activity has been a common theme. Other holdings bid for during the sixmonth period include the software design company AVEVA as well as the data-centre owner and operator Telecity. AVEVA has agreed a merger with Schneider Electric, while Telecity, after initially agreeing a tie-up with EU peer Interxion, was instead bid for outright by US competitor Equinix, underscoring the attractiveness of its assets. As at the period end, over 7.8% of the portfolio was in a bid situation reflecting the current high level of M&A activity in the market.

OUTLOOK

With the UK election now behind us, the focus has again shifted to the international stage and the recent retreat in markets. With the main impetus to this being the market recognising a slowdown in the Chinese economy (which has in any case been evident for some time), investors are now looking towards the future mooted increases in US and UK base rates. The US Federal Reserve has signalled with ever greater clarity the likelihood of a rate rise before the year end and the UK is widely expected to follow suit next year. We have been in this position before and tightening interest rates in the US and a strengthening dollar may not be to the detriment of equity market returns there. However, investors are showing their concerns on this. In the UK, the recent election win by the Tories has seen the surprise increase in the UK minimum wage and already there are a number of retail focussed firms warning of the impact this could have on profits. The outlook for wage growth should, in aggregate, aid the economy though and the prospect for domestic focussed equities continues to look brighter than for more international or commodity-market stocks.

General Shares - Income	3.58%	3.58%
Institutional Shares – Income	3.08%	3.08%

The ongoing charges figure is based on the last six month's expenses for the period ending 31 August 2015 and may vary from year to year.

It excludes the costs of buying or selling assets for the sub-fund (unless these assets are shares of another fund).

² To 14 March 2014.

³ To 18 January 2011.

Typically lower rewards Lower risk Typically higher rewards Higher risk 1 2 3 4 5 6 7

The sub-fund is ranked as 5 because it has experienced medium to high rises and falls in value over the past five years. Please note that even the lowest ranking does not mean a risk-free investment.

The Risk and Reward Indicator demonstrates where the sub-fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the sub-fund.

INVESTMENT OBJECTIVE AND POLICY

The investment objective of the ConBrio UK Smaller Companies Fund is to achieve long term capital growth. The investment policy of the sub-fund is to invest predominantly in the shares of quoted smaller UK companies, including those listed on the Alternative Investment Market.

INVESTMENT REVIEW

PERFORMANCE

For the period from 1 March 2015 to 31 August 2015, the ConBrio UK Smaller Companies Fund, as measured by the General Income shares, recorded a total return of 7.8%, compared to a total return from the IA UK Smaller Companies sector average of 7.3%.

MARKET REVIEW

UK smaller companies were a bright spot during a period when equities generally produced negative returns as investors retreated from riskier assets in favour of cash and bonds. The sharp reversal in the price of crude oil, which had begun to rise again from the lows of January, has been prompted by a deceleration in the Chinese economy. With the price of crude retreating again, it fell below \$43/barrel towards the end of August having previously stood at almost \$68/barrel at the beginning of May. Although the fall in oil prices should translate to lower costs for industries in aggregate, the volatility as well as implications for trade from a slowing Chinese economy saw equities fall from the highs of April to end the period several percentage-points lower.

Nominal assets benefited as yields pulled back despite US and UK central banks signalling rate rises on the horizon. Benchmark UK 10 year yields went on something of a round trip during the period, rising from 1.8% at the start to hit 2.2% as the General Election prompted some uncertainty on UK fiscal discipline, before falling again as equities sold off and investors bought bonds, closing back at 1.8%.

PORTFOLIO ACTIVITY

Three new holdings were established during the period under review. Amino Technologies provides software technologies and hardware platforms that enable delivery of digital entertainment and interactivity over IP networks. Earnings are forecast to grow steadily and the company has committed to grow the dividend by at least 10% in each of the next two years. Greggs is the UK's leading bakery retailer trading from more than 1,650 shops throughout the UK specialising in making and selling sandwiches, savouries and other baker-fresh food on the go.

Finally, Lakehouse is a leading asset and energy support services company, focused on customers in the UK outsourced public and regulated services sectors. The group delivers a range of essential services through a successful model based on long term contractual relationships with local authorities, housing associations and energy companies. In addition, the positions in AB Dynamics and Inspired Energy were increased.

The holdings in French Connection, Photo-Me International and Volex were sold during the period, while several of the larger holdings in the portfolio were reduced following strong performance, including Charles Stanley, Clarkson, GB Group and Mattioli Woods.

OUTLOOK

UK smaller companies have outperformed their larger counterparts by a significant margin over the last six months. While such exceptional outperformance is unlikely to be repeated in the coming months, the UK economy is performing well and provides a positive backdrop against which UK small companies should continue to prosper. Recent news from most of the companies held in the ConBrio UK Smaller Companies Fund has been positive, auguring well for the performance of the Fund over the next few months.

Source: Castlefield Investments, September 2015. Performance data taken from FE Analytics, quoted on a total return, bid to bid, UK sterling basis. Past performance is not a guide to future returns.

The total purchases and sales during the period were as follows:

Purchases	Costs £'000	Sales	Proceeds £'000

NOTE TO THE FINANCIAL STATEMENTS

1. ACCOUNTING POLICIES

The interim financial statements have been prepared under the historical cost convention, as modified by the revaluation of investments and in accordance with the Statement of Recommended Practice 'Financial Statements of Authorised Funds', issued by The Investment Association in May 2014, the Financial Conduct Authority's Collective Investment Schemes sourcebook and the Instrument of Incorporation.

DISTRIBUTION TABLES

Expenses exceeded revenue during the period, as a result no distributions were paid (2014: same).
