Castlefield B.E.S.T Sustainable Income Fund – General Income

A sub-fund of the Castlefield Funds
 General Income Shares, ISIN GB00B13NP853
 Authorised Corporate Director – Castlefield Fund Partners Limited

Objectives and investment policy

The investment objective of the Fund is predominantly to generate a relatively high level of current income, together with income growth and some capital growth over the long term.

This is to be achieved by investing principally in a portfolio of UK equities, although money market instruments, collective investment schemes, deposits, warrants, derivatives (for hedging purposes) and other permitted investments and transactions may also be invested in.

In seeking to achieve the stated investment objective, the Investment Adviser uses a responsible investment research process to identify the universe of securities from which the Fund may invest. The four criteria that need to be evidenced by each investment are reflected in the name of the Fund where “B.E.S.T” indicates Business & financial, Environmental & ecological, Social and Transparency & governance; however equal weighting may not be given to each element of these criteria when screening potential investments.

The Investment Adviser then supplements this research process by selecting only those investments which, by their nature, are considered to be sustainable in order to meet the investment objective. Sustainable activities are considered to be those necessary to ensure the long term continuity of an activity, system, society or enterprise. Further information on the “B.E.S.T” criteria and sustainability element may be obtained from the Investment Adviser upon request.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The coloured area in the table below shows the Fund’s ranking on the Risk and Reward Indicator.

The Fund is ranked as a 4 because it has experienced relatively high rises and falls in value over the past five years.

Please note that even the lowest ranking does not mean a risk-free investment.

The indicator may not take fully into account the following risks of investing in this fund:

- The Fund holds equities concentrated by location in the UK. Equities, as an asset class, tend to experience higher volatility than many other asset types such as bonds or money market instruments. Funds concentrated in one geographic location are more vulnerable to market sentiment in that specific location and can carry a higher risk than funds holding more diversified assets.
- The level of targeted income is not guaranteed and may not be achieved.

A more detailed description of the risks identified as being applicable to the Fund are set out in the ‘Risk Factors’ section of the Prospectus.
