CFP SDL UK Buffettology Fund - Institutional Accumulation

A sub-fund of the Castlefield Funds
Institutional Income Shares, ISIN GB00BF0LDZ31
Authorised Corporate Director - Castlefield Fund Partners Limited

Objectives and investment policy

The investment objective of the Fund is to seek to achieve an annual compounding rate of return over the long term which is superior to the performance of the UK stock market.

The Fund will invest principally within a portfolio of UK equities, and may also invest in other transferable securities, money market instruments, units and/or Shares in other collective investment schemes, deposits, warrants, cash and near cash. The Investment Adviser will adopt a focussed approach to investing in shares of those companies which it believe have strong operating franchises and experienced management teams and whose shares are undervalued and offer the potential for improved economic growth.

The Fund may also invest in derivatives and forward transactions (for hedging purposes). The Fund may borrow and enter into stocklending and underwriting transactions in accordance with COLL.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The coloured area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

The Fund is ranked as a 4 because it has experienced relatively high rises and falls in value over the past five years.

Please note that even the lowest ranking does not mean a risk-free investment.

As there is less than five years of available data for this Fund, for illustrative purposes a similar type of investment has been used to calculate the risk/reward profile.

The Fund holds equities concentrated by number and by location in the UK. Equities, as an asset class, tend to experience higher volatility than many other assets such as bonds or money market instruments. Funds concentrated by number of assets and/or geographic location are more vulnerable to market sentiment impacting on one or more of those assets or location and can carry a higher risk than funds holding more diversified assets.

A more detailed description of the risks identified as being applicable to the Fund are set out in the 'Risk Factors' section of the Prospectus.
