Fund Objective and Strategy

The investment objective of the Fund is to seek to achieve an annual compounding rate of return over the long term, defined as 5-10 years, which is superior to the median performance of all of the funds forming the official peer group of which the Fund is part. 'Peer group' is defined as being the Investment Association sector to which the Fund has been allocated (currently being the UK All Companies Sector) or to which it may be allocated in future, as determined by that body. Investments will be made principally in UK equities with strong operating franchises and experienced management teams, applying the methodology of Business Perspective Investing.

Fund Commentary

June was a month best forgotten with a slew of company-specific news taking its toll on the Fund share price. The Institutional Income (I) Class fell by 2.1% from 326.67p to 319.97p set against the UK stock market recording a rise of 3.4%. This meant that our performance in the first half of 2019 represented a gain of 13.1% versus 10.4% for the market. UK Buffettology has again received Money Observer's Best Larger UK Growth Fund award for 2019, marking the fifth consecutive year that it has taken the best growth fund accolade: 2015-17 in the smaller fund category; and 2018-19 in the larger fund category.

Early in the month, bad news emanated from Scapa on news that Convatec was cancelling a master supply agreement with Scapa's North American tapes business. This was only mitigated by the decision of Heejae Chae to stay on as CEO to take charge of (and hopefully resolve) the issue. The shares fell 36.3% on the month. Next up were Air Partner (-14.2% on disappointing H1 trading), MJ Gleeson (-15.9% on the resignation of long-standing CEO Jolyon Harrison), Hargreaves Lansdown (-14.6% on contagion from the Woodford fund gating) and PayPoint (-11.3% on the revenue hit from termination of the British Gas prepayments contract). The pièce de résistance, however, was served up on the last trading day by Craneware, down 35.0%. Three products that are about to become available on the Trisus platform have resulted in a hiatus in ordering in the old form. Investors were unforgiving given a share price that was pregnant with profit ripe for the taking. These six double-digit fallers were joined by 12 other single-digit fallers. Failing manfully to take up the slack were 14 gainers, led by Games Workshop, whose share price rose by 12.0%, Rotork 11.5% and Victrex 10.4%.

Net inflows for June were £79.1m and AUM at the month-end £1,074m. Activity was again brisk with £62.0m invested, all of which was used to top up existing holdings. As we enter July, we bid farewell to the General Income (G) share class. This was the original, legacy class offered when the Fund was first set up. Post RDR, it and its ilk became known as 'dirty' classes. Holders in the G class are being migrated into the I class (a 'clean' class) with a saving of 0.5% in annual management fees. Alongside, the quanta for lump sum and regular investment in the I class are being lowered to that of the original G class.
