Castlefield B.E.S.T Sustainable UK Smaller Companies Fund – General Income Shares

A sub-fund of the Castlefield Funds

Institutional Income Shares, ISIN GB00B1XQNH95

Authorised Corporate Director – Castlefield Fund Partners Limited

Objectives and investment policy

The investment objective of the Fund is to achieve long term capital growth, which is superior to the median performance of all of the funds forming the official peer group of which the Fund is a part. 'Peer group' is defined as being the Investment Association sector to which the Fund has been allocated (currently being the UK Smaller Companies sector) or to which it may be allocated in future, as determined by that body. Long term means over a minimum investment horizon of five years.

The investment policy is to invest predominantly in the shares of quoted smaller UK companies, including those listed on the Alternative Investment Market.

In seeking to achieve the stated investment objective, the Investment Adviser uses a responsible investment research process to identify the

universe of securities from which the Fund may invest. The four criteria that need to be evidenced by each investment are reflected in the name of the Fund where "B.E.S.T" indicates Business & financial, Environmental & ecological, Social and Transparency & governance; however equal weighting may not be given to each element of these criteria when screening potential investments. The Investment Adviser then supplements this research process by selecting only those investments which, by their nature, are considered to be sustainable in order to meet the investment objective. Sustainable activities are considered to be those necessary to ensure the long-term continuity of an activity, system, society or enterprise. Further information on the "B.E.S.T" criteria and the sustainability element may be obtained from the Investment Adviser upon request.

Risk and Reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The coloured area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

The Fund is ranked as a 5 because it has experienced relatively high rises and falls in value over the past five years.

Please note that even the lowest ranking does not mean a risk-free investment.

The Fund holds assets concentrated in the small capitalisation UK equity markets. Assets may also be concentrated by sector. Equities, as an asset class, tend to experience higher volatility than bond or money market

portfolios. Funds concentrated by capitalisation, sector and/or geographic location are more vulnerable to market sentiment in that specific capitalisation, sector or location and can carry a higher risk than funds holding more diversified assets.

The indicator may not take fully into account the following risks of investing in this fund:

Liquidity risk: during difficult market conditions some securities, such as structured investments, corporate bonds and positions in emerging markets, may become more difficult to sell at a desired price.

Counterparty risk: arising from securities which require a specific entity, usually a large bank, to honour its obligations to the fund.

Operational risk: arising from investments in overseas markets, in particular emerging market countries, which may not have the same level of safekeeping and other controls as UK markets.

Legal or tax risk: arising from a change in legal regulations, tax rules or the application of them.
