RISK PROFILE AND INVESTMENT OBJECTIVE

At the heart of every investment decision is a basic 'trade off' between risk and possible reward. Broadly speaking, the greater the risk attached to an investment, the greater the potential reward but the greater the possibility also of not achieving your objective. Economic cycles and other factors can cause significant changes in the value of securities – both up and down. As a result, investment should only be undertaken on a medium to long-term view. We will act in accordance with your stated willingness to accept risk.

Opinions constitute our judgement as of this date and are subject to change without warning. The officers and employees of CIP, may have positions in any securities mentioned herein. This document shall be governed by and construed in accordance with the law of England and Wales and is subject to the exclusive jurisdiction of the English Courts. The information, products and services referred to in this publication are not directed at any person or entity in any jurisdiction or country outside the United Kingdom.

The information in this document is not intended as an offer or solicitation to buy or sell securities or any other investment or banking product, nor does it constitute a personal recommendation.

Past performance is not necessarily a guide to future returns and may not be repeated. The value of investments may go down as well as up, and you may not recover the amount of your original investment. The value of investments and the income from them with exposure to foreign currencies can be affected by exchange rate movements. Certain investments carry a higher degree of risk than others and are, therefore, unsuitable for some investors.

The tax treatment of investments depends on each investor's individual circumstances and is subject to changes in tax legislation. It is recommended that potential investors seek advice concerning the suitability of any investment from their financial adviser. The performance of actual portfolios linked to this Model Portfolio may differ from the performance of the Model Portfolio shown due to the variation of timing in the initial investment or rebalancing differences resulting from minimum transaction size limits on the investment platform.
